Profile

Flutter Developer with hands-on experience building scalable, production-ready mobile applications for Android, iOS, and Web. Skilled in developing clean, maintainable, and user-focused apps using Flutter, Dart, Riverpod, GetX, Provider, and Clean Architecture. Experienced in integrating REST APIs, Firebase, Google Maps, real-time tracking, WebSockets, Stripe payments, localization, and secure authentication systems. Strong understanding of software design principles, responsive UI development, and real-world client delivery workflows.

Skills

Architectural Patterns: OOP, Clean Architecture, MVVM, MVP, Repository Pattern.

State Management: Riverpod, GetX, Provider.

API Integration: RESTful APIs, Dio, JSON Parsing, JWT Authentication, Error Handling.

Real-Time Data Processing: Firebase (FCM), WebSockets (Socket.io), Push Notifications.

Maps & Tracking: Google Maps, Geolocation, Real-time Location Tracking, Polyline Routing, Marker Control.

Payments & Subscriptions: Stripe Integration, Subscription Systems, Payment Workflow.

Local Storage: SharedPreferences, Hive, Local Caching.

Version Control: Git, GitHub (Repositories, Branching, Collaboration).

Tools & Platforms: Firebase, Postman, FVM, Android Studio, VS Code.

Advanced Features: Localization (Multi-language Support), OCR, Face Liveness Detection, AI Chatbot Integration.

Professional Experience

Softvence Delta

Flutter Developer

July 2024 – April 2025

Dhaka, Bangladesh

- Developed and delivered 20+ Flutter applications, including client-based production apps.
- Converted business and client requirements into scalable, user-friendly mobile solutions.
- Designed and implemented high-fidelity, responsive UI screens with modern app flows.
- Implemented Google Maps, Geolocation, and dynamic data handling.
- Applied Riverpod, GetX, and clean architecture practices for maintainable development.
- Ensured quality delivery through testing, debugging, and client feedback cycles.

Projects

Delivery Mobile Application

Flutter, Riverpod, Firebase, Google Maps

[Source Code]

- Developed a two-sided delivery marketplace with 160+ screens using Flutter and Clean Architecture.
- Integrated real-time GPS tracking, Google Maps, and polyline routing for live delivery monitoring.
- Implemented Stripe payments, OTP-based delivery confirmation, and JWT-authenticated REST APIs.
- Added FCM push notifications, document upload system, and multi-language localization.
- Built a scalable foundation using a Google Maps Flutter starter for map display, markers, and camera controls.

ATLISS

[Source Code]

Cross-Platform Food Marketplace App

- Built a food truck marketplace app with dual-role access for customers and vendors across 150+ screens.
- Integrated Google ML Kit for face liveness detection and OCR-based ID verification.
- Developed vendor analytics dashboards, subscription plans, and role-based authentication flows.
- Applied Clean Architecture, Riverpod, and REST API integration for scalable app development.

ChatterSticks

[Source Code]

Comic Streaming Mobile App

- Developed a comic streaming application with secure authentication and smooth content browsing.
- Implemented JWT login/signup, OTP email verification, and password reset flow.
- Integrated real-time notifications using Socket.io and Firebase Cloud Messaging (FCM).
- Built a comic reader system with episode browsing, image rendering, and reading history tracking.

Hedset

[Source Code]

Recipe & Meal Planning App

- Built a cross-platform recipe and meal planning app for Android, iOS, and Web.
- Developed personalized recipe recommendations, OTP authentication, and Stripe premium subscription flow.
- Integrated an AI-powered nutritionist chatbot and used Hive for local caching.
- Applied Riverpod, GoRouter, and Clean Architecture for maintainable app structure.

Education

Daffodil International University

2021 – 2025

BSc in Computer Science and Engineering

Certificates

App Development with Flutter

Ostad (Batch-9)

Completion Certificate

Result - Ranked 1st position
